

## Security Consulting

How Much Security is Enough? How much do you need?

Does your Security, Loss Prevention and/or Workplace Violence Prevention and Response Program address your true Threats, Risks and Vulnerabilities? Does it fit your unique Culture, Values, Budgets and History?

Are you spending more on Security than you need to? Is your Security Program a random blend of varying components deployed over time in response to incidents and issues?

Where to begin? How do you Measure and Evaluate your Security, Loss Prevention or Workplace Violence Prevention and Response Program?

A Comprehensive Security Vulnerability Assessment or Security Survey is the ideal First Step and can be a Powerful Countermeasure and Deterrent in itself.
